ABOUT SPECIFIC PRODUCTS & SERVICES

How Did Bindagraphics Do That?

- Our high-speed windowing machine automatically attaches a polypropylene window to any die cut area, for this project a multi-view window.
- After attaching the window we converted a double-thick front cover, concealing the window inside and rendering it invisible.
- The die was created in-house using our innovative CAD/CAM system. This system automatically creates each die based on artwork files you provide, ensuring the final product matches your original design.
